

MINERVA

SUSPENSION

TYPE:

PROJECT NAME:

MINERVA

design_ Chiamonte Marin

A name that brings back the past, to the unforgettable Italian Minerva matches, products that have characterized the daily life of millions of Italians for decades. This suspension comes to life taking inspiration from this simple source of fire. It is characterised by the position of the heat sink, designed to represent the key point of the entire item. The diffusers are in blown glass, in very soft colors, created with the typical Murano glass processing techniques.
